Backend: Django, Django REST Framework, Python, Node.js, Express.js, RESTful API Design, Authentication, Authorization

Databases: MySQL, MongoDB, SQLite, Relational Data Modeling, Query Optimization

DevOps: Git, GitHub, Vercel, VPS, cPanel, SSL/TLS, DNS, Domain Management, Production Deployment

Integrations & Practices: Stripe, Google Maps, GA4, Search Console, Supabase, Email OTP, Agile/Scrum, Testing, Debugging, Performance Optimization, Technical SEO

PROFESSIONAL EXPERIENCE

Happy Marine Shipping L.L.C | Dubai, UAE | Jan 2025 - Present

Full Stack Developer

- Lead end-to-end development and production support for Mariniz.com, a B2B maritime platform used across ship sale, chartering, cargo, and requirement workflows.
- Delivered 6 core modules: Ships for Sale, Purchase Queries, Open Ships, Open Cargo, Ship Requirements, and Cargo Requirements.
- Engineered React.js interfaces and Django REST Framework APIs with reusable components, advanced search, filtering, pagination, secure CRUD operations, and role-based admin workflows.
- Secured platform access with email OTP, permission controls, protected contact data, validation, and authenticated update/delete operations.
- Integrated Stripe payments and invoices, Google Maps deep links, GA4, Search Console, sitemap/technical SEO, and Supabase-backed admin chat features.
- Operate 2 production environments across Vercel and VPS/cPanel and streamlined 3 approval pipelines with approved/pending dashboards, counters, search, and admin actions.

Altos Technologies | Kochi, India | 2024 - 2025

Full Stack Developer - React & Django

- Delivered React.js and Django applications that contributed to a reported 30% improvement in user engagement and application performance.
- Optimized REST API architecture and database access patterns, reducing average API response time by 20%.
- Introduced structured debugging and testing workflows that reduced production defects by 40%.
- Refactored database schemas and queries, cutting processing time by 15% while supporting higher concurrent user loads.

SELECTED PROJECTS

Hospital Administration System | React.js, Django REST Framework, MySQL

- Created 3 role-based modules - Reception, Doctor, and Pharmacy - with secure authentication, patient IDs, appointments, prescriptions, history, search, and REST API integration.

E-Commerce Book Store | MongoDB, Express.js, React.js, Node.js

- Developed a MERN application with product browsing, cart, checkout, orders, JWT authentication, password encryption, and an admin inventory dashboard.
